KM.ON   STOLL

C+ k.innovation
CREATE PLUS

k.innovation CREATE PLUS is the new dimension in flat knitting machinery programming. Combining a fully featured advanced programming system with an easy to learn user interface will greatly enhance your knitting capabilities. Realistic fabric view, intelligent tools, open interfaces and the connection to the KM.ON cloud embed CREATE PLUS perfectly into the upcoming digital workflows. The integration of a grading system, a full set of highly customizable modules and the ability to process the entire knitting order in few steps will dramatically reduce your time to market.
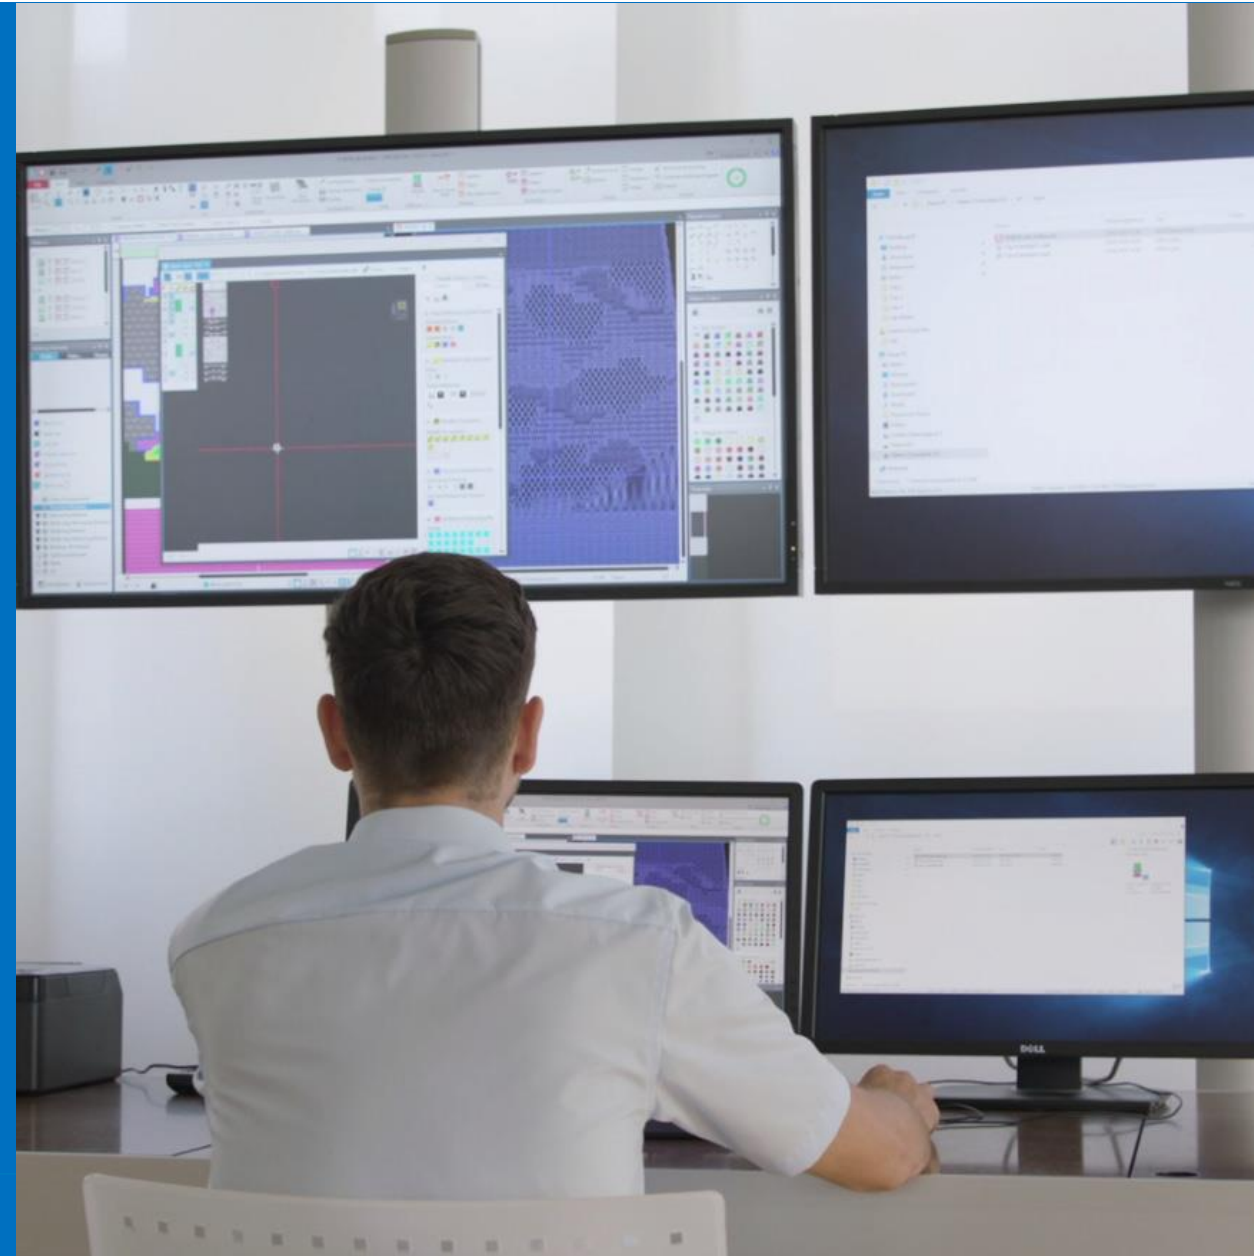

**Welcome to the new world of k.innovation CREATE PLUS powered by STOLL.!**

CUSTOMER BENEFITS

+ Developed to enhance programmer's abilities

+ Easy-to-learn user interface

+ Easy to use

+ Reduces time to market

    +Faster creating patterns with sizes (up to 95% time saving)

    +Faster creation of patterns with graphics (up to 85% time saving)

    +Faster making changes to all sizes and/or patterns within one project (up to 80% time saving)

+ Can be perfectly integrated into the upcoming digital workflows

+ Quick product development times and cost saving due the digitization of the whole knitwear design and development process

+ Digital Yarn

+ Digital Yarn Creation

+ Export for 3D

FEATURES

+ Authentic fabric-view

+ Intelligent Features

+ Open interfaces

+ Integration of a grading system

+ Connectivity interface to third-party software

+ Full set of highly customizable modules

+ Ability to process the entire knitting orders in few steps

+ All CREATE features are available

k.innovation CREATE PLUS

SIMPLY STAY ON TOP OF THINGS
work with different views simultaneously

Working with different views simultaneously:

Basic, expanded, graphical shape view and line shape view can be changed simultaneously. They are automatically updated – no "technical editing" or refreshing buttons needed.
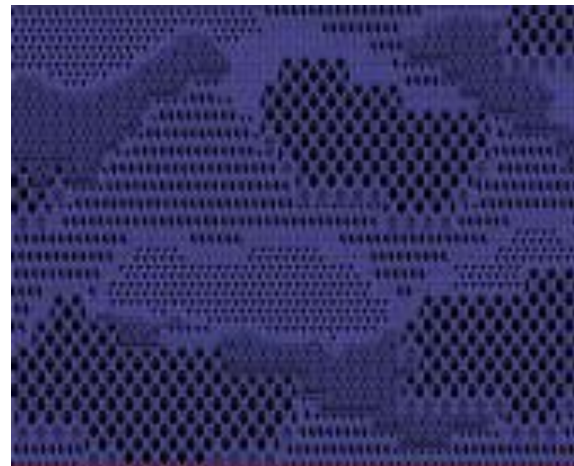

Saves time and nerves!!

VISUALIZE YOUR IDEA BEFORE YOU START PRODUCING

Authentic knitting-view

Reduce the amount of prototypes by getting a perfect preview of your knitted fabric.

Now with stitch distortion.

New Pattern Project

New Knitting Element

New Lined Shape Project

New Dimensioned Shape Project

Even faster than before!

Grading System included

GKS (Grading for Knitting System) is fully integrated in the CPS (Connective Pattern Software).
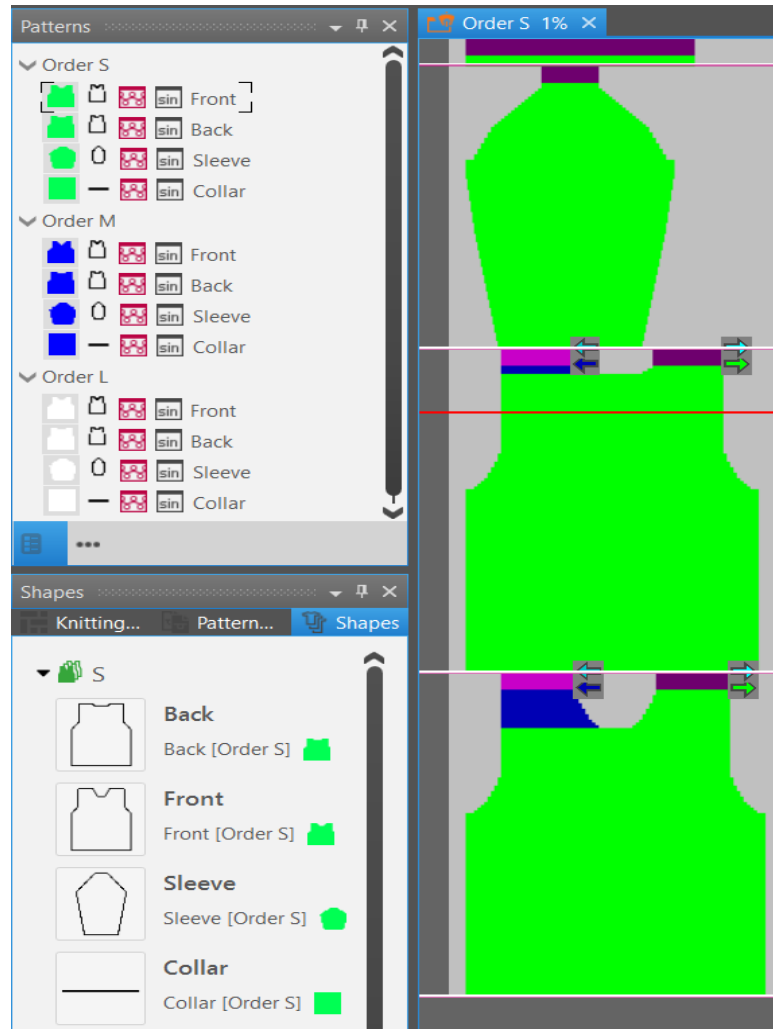

Benefits:

- No extra software needed

- No additional licenses

- Time saving by shape creation and grading (creating sizes)

- All machine programs are saved at once (in the M1plus every single pattern must opened, changed, created, saved)

EASY SHAPE CREATION

Graphical Shape-Editor

Working only with shape outlines helps to keep the shape in focus.

k.innovation CREATE PLUS

**BATCH PROCESSING SPEEDS UP YOUR PROGRAM SETUP**

Project Management

One Project – Many Patterns

One Project – Many Shapes

No laborious individual modifications on each garment piece or size anymore!

Changes on different parts and sizes of a garment can be done at once and simultaneously with a **click of the mouse.**

EFFICIENCY!

Yarn Carrier View

Yarn Carrier Allocation

Color Parameter Table

All the parameters for binding, knit-in and knit-out, clamping and cutting are aloccated to the yarn carrier,
not to a yarn field.

So it is not possible to loose parameters and information for the technical processing

IT IS SO EASY TO CREATE AND TO CHANGE MODULES NOW!

Simplified modules and Cas:

• All the modules can be easily edited.

• Even after technical editing! And no need to go back to basic pattern

• No container modules anymore. No complicated modules built within other modules anymore.

• All modules (not only the ones that are being used) are imbedded in the pattern and can be easily adjusted.

• Small and easy to handle Module Explorer with preview and search function

*CREATE PLUS is a value-added tool to any knitting factory as it enables an **efficient** and **time saving** creation of knitting programs.*
